

# Turned

# To

# Stone!

On the 24<sup>th</sup> August the people of Pompeii thought that another earthquake was happening, but they were wrong. Mount Vesuvius their Gentle Giant was erupting.

It lasted 2 days, the people got turned into stone by the lava! The people collected their valuables.

The people thought it was an earthquake so they started to collect their valuables.

The dust clouds made them suffocate because they were full of sulphur, ash and hot steaming lava.

The people tried to escape from the steaming hot lava.
